### **Notice to Borrowers**

Unpublished theses deposited in the Library of Kennesaw State University must be used only in accordance with the stipulations prescribed by the author in the preceding statement.

The author of this thesis is:

Noah Gardner  
1100 S Marietta Parkway  
Marietta, GA 30060

The director of this thesis is:

Chih-Cheng Hung  
1100 S Marietta Parkway  
Marietta, GA 30060

Users of this thesis not regularly enrolled as students at Kennesaw State University are required to attest acceptance of the preceding stipulations by signing below. Libraries borrowing this thesis for the use of their patrons are required to see that each user records here the information requested.

Kennesaw State University

May 2022

## **ABSTRACT**

There is a large variety of ant species, and most species are diverse in terms of size, shape, behaviors, and especially skin (cuticle) textures. However, the significance of ant cuticle texture is not widely researched. This research employs modern machine learning methods such as texture analysis and classification with CNN and clustering to automatically group similar ant species to allow for the study of influences cuticle texture on ant ecology.

Kennesaw State University

May 2022

Never fail to have this attitude of mind, go forward without hurry, learn the essence of things through frequent experiences, taking advantage of every occasion. Fight against all kinds of people and be aware of their mind. Follow a road that is a thousand leagues long one step at a time. Be without haste and be convinced that all these practices are the duty of a bushi. Be victorious today over what you were yesterday; tomorrow be victorious over your clumsiness and then also over your skill. Practice in accordance with what I have written without letting your mind deviate from the way.

Miyamoto Musashi <sup>1</sup>

## **ACKNOWLEDGEMENTS**

I would like to thank my loving family for their support throughout the completion of my graduate degree. I would also like to thank Dr. Chih-Cheng Hung for his mentorship for my thesis and for his guidance in my other research projects.
